---

## EDUCATION

**University of Management and Technology**  
Bachelor of Science in Computer Science

Lahore, Pakistan  
Graduating Summer 2026

---

## SKILLS SUMMARY

**Languages:** JavaScript, SQL

**Frameworks / Libraries:** React.js, Next.js, Node.js, Express.js

**Tools / Databases:** MongoDB, MySQL, Docker, Git

**Platform:** Visual Studio Code

**Soft Skills:** Assertive Communication, Team Management, Problem-Solving & Critical Thinking

---

## PROJECTS

- **Full-Stack Authentication System** | [LINK](#)  
Developed a secure authentication system with Next.js and MongoDB, implementing signup, login, middleware-based route protection, and user verification emails. Used libraries such as Mongoose, bcrypt, nodemailer, and JWT to ensure security and reliability.
- **Full-Stack QnA System** | [LINK](#)  
Built a Stack Overflow–like QnA platform using Next.js and Appwrite, with features for posting questions, answers, and handling user preferences. Implemented data modeling with Appwrite’s Node SDK, state management with Zustand, and complex voting functionality (upvote/downvote) to enhance user interaction.

---

## CERTIFICATES

- **Complete Web Development Course (Udemy)** | [LINK](#)  
Trained in frontend (HTML, CSS, JavaScript, React.js, Tailwind) and backend (Node.js, Next.js, Appwrite) with databases like MongoDB, MySQL, PostgreSQL, building full-stack projects using Git/GitHub and Docker.
